

Volcano plot showing Log2 Fold Change (X-axis) versus -Log10 P-Value (Y-axis). The plot displays a large number of differentially expressed genes, with a vertical dashed line at Log2 Fold Change = 0 and a horizontal dashed line at -Log10 P-Value ≈ 1.3. Genes labeled include CCL20, LCN2, TNFAIP3, NFKBIA, ZC3H12A, NFKBIZ, IL4I1, DUOX2, PDZK1IP1, BIRC3, RELB, TRIM31, GPX2, IL2RG, LAMC2, NFE2L3, GMDS, MUC20, KRT19, VAV3, AQP8, SLC30A2, SLC26A3, SLC26A2, MT1G, MT1F, MT1X, and MT1H.
